

CRMS Server Configuration and Validation Details

This document lists detailed configuration of each server including OS version, disk layout, CPU, memory, network adapters, and additional relevant information. It also includes intentionally conflicting details to help validate monitoring, inventory, and CMDB systems by detecting mismatches.

1. Server Configuration Details

Server Name	Role	OS Version	vCPU Count	Memory (GB)	Disk Layout	Network Adapters	Comments
LB-01	Load Balancer (F5 BIG-IP)	F5 TMOS 15.1	4	8	1x100GB (boot)	2 NICs (HA + External)	HA pair with LB-02
LB-02	Load Balancer (F5 BIG-IP)	F5 TMOS 15.1	4	8	1x100GB (boot)	2 NICs (HA + External)	Failover Node
API-GW-01	API Gateway	RHEL 8.6	4	16	1x50GB (OS), 1x100GB (/var/log)	2 NICs (DMZ + Internal)	Primary API Gateway
API-GW-02	API Gateway	RHEL 8.6	4	16	1x50GB (OS), 1x100GB (/var/log)	2 NICs (DMZ + Internal)	Clustered with API-GW-01
APP-01	App Node	RHEL 8.6	8	32	1x50GB (OS), 1x250GB (Docker), 1x100GB (/var/log)	3 NICs (Mgmt + PodNet + Internal)	Part of K8s cluster

APP-02	App Node	RHEL 8.6	8	32	1x50GB (OS), 1x250GB (Docker), 1x100GB (/var/log)	3 NICs (Mgmt + PodNet + Internal)	Part of K8s cluster
APP-03	App Node	RHEL 8.5	8	28	1x50GB (OS), 1x250GB (Docker), 1x100GB (/var/log)	3 NICs (Mgmt + PodNet + Internal)	△ OS version slightly different (intentionally conflicting)
DB-PRI	Primary SQL Server	Windows Server 2022	16	64	1x100GB (OS), 1x500GB (Data), 1x250GB (Logs), 1x100GB (TempDB)	2 NICs (Cluster + Internal)	AlwaysOn Primary
DB-SEC	Secondary SQL Server	Windows Server 2019	16	64	1x100GB (OS), 1x500GB (Data), 1x250GB (Logs), 1x100GB (TempDB)	2 NICs (Cluster + Internal)	△ OS version mismatch (intentionally conflicting)
CACHE-01	Redis Cache	RHEL 8.6	4	16	1x50GB (OS), 1x100GB (Cache Data)	2 NICs (Internal + HA)	Primary Cache Node
CACHE-02	Redis Cache	RHEL 8.6	4	8	1x50GB (OS)	2 NICs (Internal)	failover scenario

						+ HA)	
MQ-01	RabbitMQ	RHEL 8.6	4	16	1x50GB (OS), 1x150GB (Queue Storage)	2 NICs (Internal + HA)	Primary MQ Node
MQ-02	RabbitMQ	RHEL 8.6	4	16	1x50GB (OS), 1x120GB (Queue Storage)	2 NICs (Internal + HA)	
MON-01	Monitoring Server	Ubuntu 22.04	4	12	1x50GB (OS), 1x100GB (Metrics Storage)	1 NIC (Internal)	Runs Prometheus + Grafana
LOG-01	Log Aggregation	Ubuntu 22.04	6	16	1x50GB (OS), 1x500GB (ELK Data)	1 NIC (Internal)	Elasticsearch + Kibana server
